

REPORT

ON WEB DEVELOPMENT 2nd PROJECT : **'REAL ESTATE'**

SHAMSHER QUTBODDINN DESAI
4CA18CS030
CALIVERY INSTITUTE OF
TECHNOLOGY
MANDYA

OVERVIEW:

This project 'REAL ESTATE' is a website made using **HTML and CSS** is a simple website designed for a Real Estate.

GOALS:

- To Attract peoples to Real Estate Business.
- To help them to find Property within their comfort .
- In this website we have various properties with different catagories.

SPECIFICATIONS:

This website provide details about the Real Estate and Enterprises. We display some more Pictures of Properties.

Resource:

- **BRACKETS** in the this we are using **HTML and CSS** as a Source code.

SOURCE CODE

1.HTML

14      <h2>This is your guide!</h2>
15
16  ▼      <!--
17          MADE WITH <3 AND JAVASCRIPT
18      -->
19
20  ▼      <p>
21          Welcome to Brackets, a modern open-source code editor that understands web design. It's a lightweight,
22          yet powerful, code editor that blends visual tools into the editor so you get the right amount of help
23          when you want it.
24      </p>
25
26  ▼      <!--
27          WHAT IS BRACKETS?
28      -->
29  ▼      <p>
30          <em>Brackets is a different type of editor.</em>
31          Brackets has some unique features like Quick Edit, Live Preview and others that you may not find in other
32          editors. Brackets is written in JavaScript, HTML and CSS. That means that most of you using Brackets
33          have the skills necessary to modify and extend the editor. In fact, we use Brackets every day to build
34          Brackets. To learn more about how to use the key features, read on.
35      </p>
36
